- Python full stack development.
- Duration (01/06/24-15/06/24).
- Python full stack development uses Python for both front-end and backend web development. Django and Flask are key back-end frameworks, while front-end integration involves JavaScript frameworks like React or Angular. Tools like Brython and Transcrypt compile Python into JavaScript. Python's simplicity, extensive libraries, and strong community support enhance productivity and maintainability.
